The Business Glossary & Metadata Starter Kit helps companies establish a consistent understanding of key business terms, performance indicators (KPIs), and metadata tags used across different platforms. This ensures clarity and efficiency in communication and data analysis. Pricing varies depending on company size, ranging from $4,000 to $8,000 for small and medium-sized businesses (SMBs), $8,000 to $20,000 for mid-size businesses, and $20,000 to $40,000 for enterprises, reflecting the increased complexity and scale of implementation in larger organizations. This investment streamlines operations and improves data governance, ultimately boosting productivity and decision-making.

The MDM Health Check service provides a thorough audit of your master data—covering crucial areas like customer, product, and vendor information—to identify and address duplicates, inconsistencies, and missing data. This proactive approach helps ensure data quality and accuracy, which is vital for efficient business operations. Pricing is tiered based on business size, ranging from $5,000 to $10,000 for small and medium-sized businesses (SMBs), $10,000 to $30,000 for mid-size businesses, and $30,000 to $50,000 for enterprises, reflecting the increased complexity and data volume involved. Ultimately, this service offers a valuable investment in data hygiene, leading to improved decision-making and operational efficiency.

The Data Catalog Proof of Concept (PoC) offers a streamlined approach to data management, focusing on establishing a catalog for one or two key domains or systems. This includes the implementation of basic metadata and lineage tracking, along with comprehensive training to ensure successful integration. Pricing is tiered based on company size, ranging from $5,000-$10,000 for small and medium-sized businesses (SMBs), $10,000-$30,000 for mid-size businesses, and $30,000-$50,000 for enterprises, reflecting the increased complexity and scale involved. This PoC provides a cost-effective way to explore the benefits of a data catalog before committing to a larger-scale deployment.

The Data Governance Playbook offers a comprehensive solution for establishing robust data governance frameworks, defining clear policies, ownership models, stewardship roles, and processes. Its price varies depending on the size of your organization, ranging from $5,000 to $10,000 for small and medium-sized businesses (SMBs), $10,000 to $30,000 for mid-size businesses, and $30,000 to $50,000 for enterprises. This scalable pricing reflects the increased complexity and scope of data governance requirements as organizations grow. Ultimately, the Playbook provides a valuable investment in ensuring data quality, compliance, and strategic decision-making.
